

WHAT MANAGEMENT GAINS

CAMS

A prioritized workday with less searching and follow-up.

LEADERSHIP

Standardized workflows, portfolio visibility, and earlier risk signals.

BOARDS

Faster mobile and email approvals with a complete decision record.

RESIDENTS

Answers across portal, mobile, email, SMS, and chat — and fewer inbound calls.

See a CAM workday come together in OnlyHOA.

Follow one real-world workflow — resident request to vendor action, approval, resolution, and board reporting.

(775) ONLY-HOA (665-9462)

EVERY OPERATOR. EVERY OWNER. ONE PLATFORM.

BUILT FOR MULTI-COMMUNITY MANAGEMENT

Give every CAM their *day back*.

OnlyHOA turns communications, resident requests, vendor work, approvals, violations, invoices, and board activity into one prioritized, accountable workflow. Every message, decision, document, and next step stays attached to the community record.

One login. One workday. *One operating record.*

Purpose-built for management companies operating at the scale of hundreds of communities and tens of thousands of homes through one standardized operating model.

CONNECTED HOA MANAGEMENT SOFTWARE · ONLYHOA.COM

THE PROBLEM

The software isn't connected. The work still has to be.

Emails live in inboxes. Approvals happen in threads. Vendor bids, credentials, commitments, and follow-up are tracked across email and spreadsheets. Board packets get reconstructed. Commitments depend on memory.

DISCONNECTED SOFTWARE

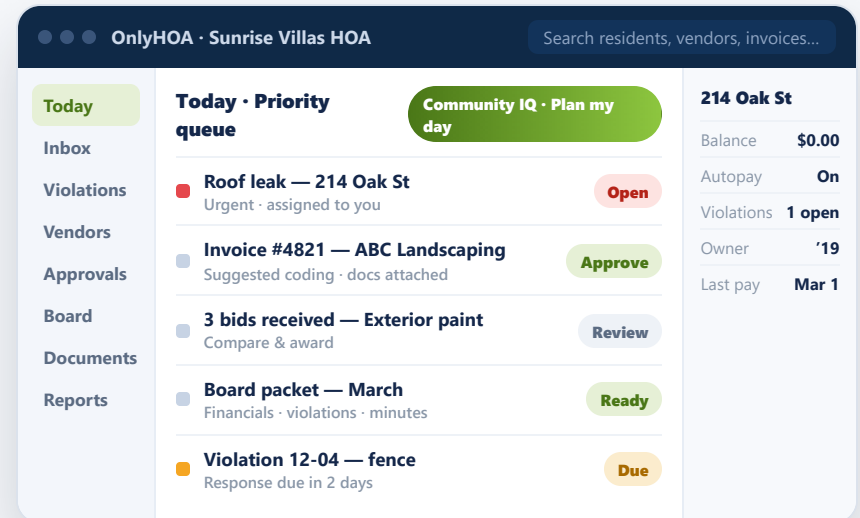

Email in one system
Violations in another
Approvals over email
Vendors in spreadsheets
Board packets by hand

ONLYHOA

One operating record
One prioritized work queue
One connected approval trail
One source of accountability
Role-based experiences for every stakeholder

Disconnected operations get *expensive at scale*. Across hundreds of communities, every handoff adds searching, follow-up, and risk.

FROM REQUEST TO RECORD

Know what matters now

See full community context

Track every commitment

01 · UNDERSTAND

Match

Connect the person, property, community, and relevant history automatically.

02 · PRIORITIZE

Rank

Urgency, ownership, deadlines, and next actions become visible.

03 · ACT

Coordinate

Request one bid or five at once; coordinate vendors, invoices, and compliance.

04 · PROVE

Record

Approvals, messages, documents, and status stay on the record.

Turn every actionable message into managed work — with context, an owner, and a next step.
